

ABSTRACT OF THE DISCLOSURE

- 5 Methods and apparatus for linking a set of code modules for execution
includes determining one or more code modules to be executed, ascertaining a
hierarchical order in which the one or more code modules are to be executed, loading
the one or more code modules to be executed, and building a chain connecting the one
or more code modules such that the one or more code modules will automatically
10 execute in the hierarchical order when a first one of the one or more code modules is
executed.
